Sheet

KRION® is a cutting-edge compact uniform mineral material developed by Porcelanosa Group, made of a high percentage of natural minerals like alumina trihydrate (ATH) and a low percentage of high-resistance acrylic resins.

- Composition with a high mineral content/Through-body renewable material
- Food grade NSF-51 | 10/2011 Regulation
- Non-porous / hygienic ASTM D670
- Sustainable DAP | SCS Recycled Content | GBCE
- Prevents the growth of microorganisms ASTM G21 | ISO 846
- High durability
- Seamless joints Visual and mechanical continuity
- Resistant to impacts Hard and tough | ISO 19712
- Thermoformable Maintains its properties when thermoformed
- High bending strength ISO 178
- High fire resistance UNE-EN 13501 (B S1-s0) | NFPA 101 (Class A) | ASTM E84
- Low thermal conductivity Conductivity similar to wood | ISO 12667
- Easy to clean NEMA LD3 | ISO 19712
- Resistant to extreme environments and to ultra-violet rays Resistant to seismic activity, frost and ice, and saline environments.
- Non-toxic BPA FREE | REACH | SO₂ FREE | Greenguard | Gold | A+ Label | LBC Red List Compliant | HPD

PROPERTIES

The following icons are a basic guide to important aspects of the properties of KRION® to take into account when choosing a colour for your project.

- MARKS**
 - Noticeable slight marks after heavy use.
 - Slight marks after heavy use, noticeable in specific lighting conditions.
 - Minor marks after heavy use, slightly noticeable in specific lighting conditions.
 - Tests in process.
- RESISTANCE TO UV RAYS**
 - Colour change of over 10ΔE in 10 years.
 - Colour change of 5ΔE to 10ΔE in 10 years.
 - Colour change of less than 5ΔE in 10 years.
 - Tests conducted over a long period of time. No conclusive results available as yet.
- RECYCLED CONTENT**
 - Colour containing some recycled material.
- TRANSLUCENCE**
 - Colour with a higher translucence when backlit.

THERMAL BENDING

- Good potential for thermal bending, the material can be 2-dimensionally bent up to the minimum radius of curvature shown in the fabricator's manual.
- High potential for thermal bending, allowing for the creation of 3-dimensional shapes, although in the case of extreme designs, a slight whitening might be noticeable near curved sections.
- A high potential for thermal bending, allowing for the creation of 3-dimensional shapes. Extreme designs can be made with no noticeable whitening near curved sections.

TESTS IN PROCESS

Tests in process.

* The thermoforming rating shown here is applicable as from batch no. UCO19.

COLLECTIONS

KRION® is suitable for all kind of applications due to its exclusives qualities, however it has been identified by collections the color's ad-equacy relating an excellent behavior on three possible frequently used applications with excellent performance and low maintenance.

(1) Only available for the colours FROST WHITE (6101), CREAM (6501), PEARL (6502), LIGHT GREY (6902) and GREY (6903).
 (2) Only available for the colour EXTREME LIGHT (4102).
 (3) Not available for the colour POMPEI (L501).
 (*) Available from the second quarter of 2019.

For further information on the above points, see the Technical Data Sheets.
