NEW COLORS & SHAPES

2016

KRION[®], el Solid Surface del Grupo PORCELANOSA, en continua búsqueda de la excelencia, cuenta con un equipo de cualificados técnicos en continuo proceso de mejora, creando colores y aumentando las propiedades para consolidarnos como la más fiable superficie sólida de nueva generación del mercado. De este modo nos aseguramos estar en la vanguardia de las tendencias y ofrecer a nuestros clientes el mejor material posible.

En 2016, con el objetivo de actualizar nuestra gama cromática, presentamos una nueva serie de planchas con infinitas posibilidades en el mundo del diseño y de la arquitectura. Variedad cromática con clara vocación global, destinados a ser utilizados tanto en el ámbito público como privado, colores que resultan acogedores y transmiten una sutil elegancia.

KRION[®] es un material que se adapta a nuestras necesidades, el solid surface ideal en la creación de espacios con tu propio estilo. "K[®] Fusion" engloba las infinitas posibilidades que presenta KRION[®], su extensa gama de figuras de colada y la posibilidad de integrarlas a la plancha, favorece la realización de composiciones exclusivas, adaptándose a las necesidades y pensado para mejorar tu calidad de vida.

KRION[®] ha sido desarrollado para mejorar nuestros espacios cotidianos, sus diferentes aplicaciones, lo convierten en el material idóneo para su utilización en viviendas, hospitales, restauración, locales comerciales, etc

As part of its commitment to excellence, KRION[™], PORCELANOSA Group's solid surface, has a team of skilled experts dedicated to introducing constant improvements to the range by creating new colours and enhancing its properties so as to forge a solid reputation for KRION[™] as the most reliable cutting-edge solid surface on the market. In this way, we make sure that we are at the forefront of new trends, offering customers a solid surface of unparalleled standards.

In 2016, in a bid to update our range of colours, we will be launching a new series of sheets with endless potential for designers and architects. Our chosen colour spectrum aspires to offer all-round potential for use in both public and private settings, with colours that stand out for their warmth and subtle elegance.

KRION[™] is designed to be easily adaptable. It is the perfect solid surface for creating settings with a customized hallmark. "K[™] Fusión" exemplifies the boundless possibilities that KRION[™] can offer, with its extensive variety of cast shapes. These can be integrated in KRION[™] sheets to make exclusive designs conceived to meet your individual needs and to improve your quality of life.

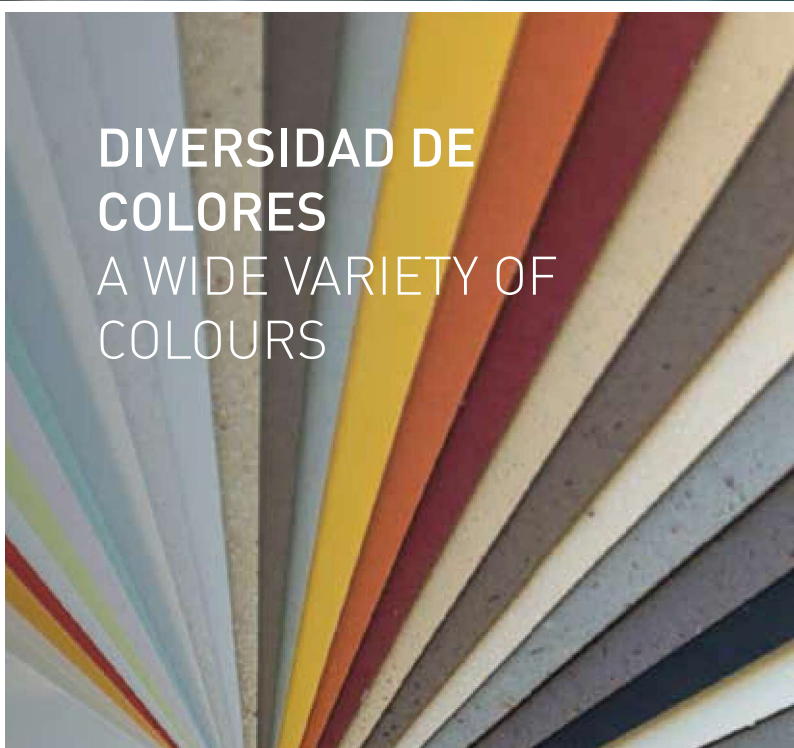

KRION[™] was developed to improve everyday living spaces. Thanks to its multiple applications, it is perfect for use in homes, hospitals, restaurants and bars, shops etc.

KRION®

PORCELANOSA SOLID SURFACE

KRION® es un material compacto creado a partir de polvo de alúmina desde 7 micras y monómeros avanzados, además de añadir exclusivos aditivos desarrollado por nuestro departamento de I+D.

El trihidrato de alúmina (ATH) es extraído del mineral y refinado antes de ser usado, llegando hasta el 99,8% de pureza.

Es un material cálido al tacto y similar a la piedra natural. Este material está compuesto por dos terceras partes de minerales naturales (ATH: Trihidrato de Alúmina) y un bajo porcentaje de resinas de gran resistencia. Esta composición dota a KRION® de unas claras particularidades exclusivas: carencia de poros, antibacterias sin ningún tipo de aditivo, dureza, resistencia, durabilidad, facilidad de reparación, escaso mantenimiento y fácil limpieza.

Se trabaja de forma similar a la madera, lo que nos permite cortar las planchas, unir las, termoformarlas para realizar piezas curvas e incluso ofrece la posibilidad de emplearse en el sistema productivo mediante inyección, logrando construir diferentes diseños y proyectos inalcanzables con otros materiales.

Podemos crear espacios sin juntas, lo cual impide la absorción de líquidos y facilita su limpieza y mantenimiento.

Disponemos de una amplia gama de colores entre los que destaca el acabado blanco por su pureza y neutralidad, sobresaliendo frente a otros materiales similares.

Es un material ecológico, ya que puede reciclarse al 100%. Todo producto fabricado con KRION® puede ser reprocesado y utilizado de nuevo en su ciclo de producción.

KRION™ is a compact alumina material, made of alumina powder with a particle size of 7 microns upwards and high-tech monomers, and exclusive additives developed by our R&D department.

Alumina trihydrate (ATH) is extracted from mineral ore and refined, prior to its use, to ensure a purity of up to 99.8%.

It is a material that is warm to the touch and similar to natural stone. It is made of two-thirds natural minerals (ATH – aluminium trihydride) and a low percentage of high-resistance resins. This composition gives KRION™ a number of exclusive features: it does not have any pores, it is anti-bacterial without any type of additive, it is hard-wearing, highly resistant and easy to repair, only requires minimum maintenance and is easy to clean.

It is shaped in a similar way to wood, making it possible to cut the sheets, connect them and thermoform them to create curved sections, and can even be injection moulded to create designs and projects that are impossible with other materials.

Seamless sections can be created, preventing liquids from being absorbed and making cleaning and maintenance easier.

We offer a wide range of colours, including a white finish that stands out for its purity and neutrality in comparison with other similar materials.

It is an ecological material, as it is 100% recyclable. All products made of KRION™ can be reprocessed and reused in the production cycle.

New

STAR Series

La serie STAR crece incorporando colores con tonalidades claras que mantienen sus ya característicos reflejos metálicos. Con la utilización de nuevas micropartículas se han obtenido colores que transmiten más tranquilidad y sosiego, que unidos a los reflejos de luz consiguen espectaculares matices visuales de gran belleza.

The STAR series has been extended with new pale colours that still retain its characteristic metal sparkle. By using new microparticles, colours have been achieved that convey a greater sense of restful tranquillity. When their sparkle is added to this, the end result is simply spectacular.
