KRION
PORCELANOSA Grupo

Sheet

KRION® is a cutting-edge compact uniform mineral material developed by Porcelanosa Group, made of a high percentage of natural minerals like alumina trihydrate (ATH) and a low percentage of high-resistance acrylic resins.

Composition with a high mineral content/ Through-body renewable material

Food grade NSF-51 | 10/2011 Regulation

Non-porous / hygienic ASTM D670

Sustainable DAP | SCS Recycled Content | GB Ce

Prevents the growth of microorganisms ASTM G21 | ISO 846

High durability

Seamless joins Visual and mechanical continuity

Resistant to impacts Hard and tough | ISO 19712

Thermoformable Maintains its properties when thermoformed

High bending strength ISO 178

High fire resistance UNE-EN 13501 (B S1 -d0) | NFPA 101 (Class A) | ASTM E84

Low thermal conductivity Conductivity similar to wood | ISO 12667

Easy to clean NEMA LD3 | ISO19712

Resistant to extreme environments and to ultra-violet rays Resistant to seismic activity, frost and ice, and saline environments.

Non-toxic BPA FREE | REACH | SiO2 FREE | GreenGuard | Gold | A+ Label | LBC-Red List Compliant |HPD

PROPERTIES			
The following icons are a basic guide to important aspects of the properties of KRION® to take into account when choosing a colour for your project.			
MARKS		RESISTANCE TO UV RAYS	
	Noticeable slight marks after heavy use.		Colour change of over 10ΔE in 10 years.
	Slight marks after heavy use, noticeable in specific lighting conditions.		Colour change of 5ΔE to 10ΔE in 10 years.
	Minor marks after heavy use, slightly noticeable in specific lighting conditions.		Colour change of less than 5ΔE in 10 years.
	Tests in process.		Tests conducted over a long period of time. No conclusive results available as yet.
RECYCLED CONTENT		TRANSLUCENCE	
	Colour containing some recycled material.		Colour with a higher translucence when backlit.
THERMAL BENDING			
	Good potential for thermal bending, the material can be 2-dimensionally bent up to the minimum radius of curvature shown in the fabricator's manual.		
	High potential for thermal bending, allowing for the creation of 3-dimensional shapes, although in the case of extreme designs, a slight whitening might be noticeable near curved sections.		
	A high potential for thermal bending, allowing for the creation of 3-dimensional shapes. Extreme designs can be made with no noticeable whitening near curved sections.		
	Tests in process.		
* The thermoforming rating shown here is applicable as from batch no. UCO1.			

* The thermoforming rating shown here is applicable as from batch no. UCO1.

COLLECTIONS
KRION® is suitable for all kind of applications due to it's exclusive qualities, however it has been identified by collections the color's adequacy relating an excellent behavior on three possible frequently used applications with excellent performance and low maintenance.
