TO BE BORNE IN MIND IN THE CASE OF THE FUSION COLLECTION

ADEMÁS PARA LA COLECCIÓN FUSION HAY QUE TENER CUENTA

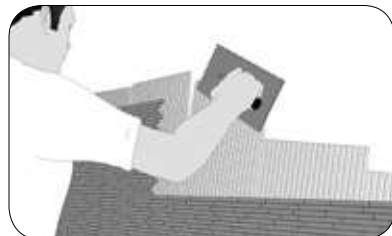

POUR LA COLLECTION, IL FAUT ÉGALEMENT PRENDRE EN COMPTE

Take special care with the use of hard or sharp objects such as installation tools, as some of these pieces may scratch easily due to their metallic nature.

Especial cuidado con el uso de objetos duros o agudos como herramientas de instalación, ya que algunas de sus piezas por su naturaleza metálica podrán rayarse con facilidad.

Il faut faire très attention lors de l'utilisation d'objets durs ou aigus, comme les outils d'installation, car certaines pièces métalliques peuvent se rayer facilement.

Maintain verticality so that all the aluminum tiles coincide at the grooves, and apply the adhesive in the opposite direction to the mosaic for a better grip.

Mantener la verticalidad para que todas las teselas de aluminio coincidan en los surcos y aplicar el adhesivo en el sentido contrario al mosaico para un mejor agarre.

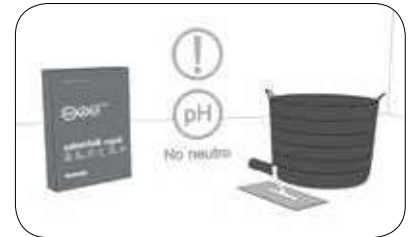

Conserver la verticalité pour que tous les carrelés en aluminium coïncident dans les creux et appliquer l'adhésif dans le sens contraire de la mosaïque pour une meilleure prise.

NOTE: In Fusion 3D mosaics, even though they have a compact composition, there may be adhesive coming out between the tiles if there is more of it than necessary.

NOTA: Los mosaicos Fusión 3D, aun teniendo una composición compacta, puede ser que salga material de agarre entre las teselas si este está en mayor cantidad de la necesaria.

NOTE : Malgré la composition compacte des mosaïques Fusión 3D, le matériel de prise peut sortir entre les carrelés s'il y a des quantités excédantes.

Grouting material with a non-neutral PH might react with the metal. Test before applying it on the entire surface, verifying that it does not change its natural color.

El material de rejunte con un PH no neutro puede reaccionar con el metal. Realizar una prueba antes de aplicarlo verificando que no cambia su color natural.

Le matériel pour faire les joints ayant un pH non neutre peut réagir avec le métal. Effectuer un test avant de l'appliquer pour vérifier que la couleur naturelle n'est pas altérée.
