SPECIFICATIONS FOR TAPS
Higher flows could lead to the overflow of the basin. We recommend using aerator 100072948 - N299999734 STANDARD AERATOR, which reduces flow to 3.5 liters/min and consequently water use. For basins with a hidden waste we recommend that the water from the tap falls between 6 and 12cm from the waste to help the water to drain correctly and avoid the basin from filling up with water.

ESPECIFICACIONES PARA LA GRIFERIA
Se recomienda el uso del aireador 100072948 - N299999734 AIREADOR ESTANDAR que reduce el caudal a 3.5 litros/min y consecuentemente el consumo de agua. En los lavabos con desagüe oculto se recomienda que la caída del agua del grifo esté entre 6 y 12 centímetros del desagüe para evitar que el agua se estanque y pueda evacuar correctamente.

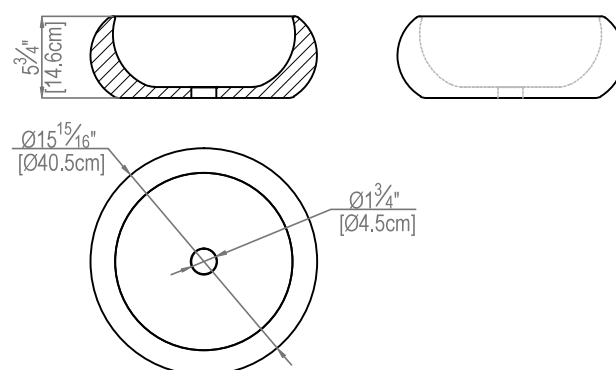

SPÉCIFICATIONS POUR LA ROBINETTERIE
Il est recommandé d'utiliser l'aérateur 100072948 - N299999734 AIREADOR ESTANDAR qui réduit le débit à 3,5 litres/min et, par conséquent, la consommation d'eau. Sur les lavabos dont la bonde est invisible, il est recommandé que la chute d'eau depuis le robinet tombe entre 6 et 12cm du percement d'évacuation afin que l'eau puisse s'évacuer correctement.
