# BATHS - BAIGNOIRES

introduction - introduction

## BENEFITS OF WHIRL TUBS - BÉNÉFIQUE DU HYDROMASSAGE

A whirl tub is much more than a luxurious accessory for your home. Bathing in whirl bath tubs for a period of time has a number of benefits, both physical and mental.

*L'hydro massage est recommandé par beaucoup de professionnels pour combattre la maladie de notre société : le stress. Les médecins le recommandaient de manière thérapeutique ; dans l'actualité, il s'agit d'une recommandation préventive. L'hydro massage peut également combattre l'anxiété et l'insomnie puisque cela fait du bien non seulement à notre corps mais aussi à notre esprit.*

### Some benefits:

- Stress relieving: mental stress can manifest itself as physical pain. By relieving this stress in a whirl tub, people can reduce their stiff necks, back aches and muscle tension. It is a rejuvenation for the body and mind.
- Sleep improving: regular users report having longer lasting and better quality sleep when they take a bath before bedtime. The hot water and jets relax the muscles and unwind the mind, getting the person's entire body and soul ready for sleep.
- Soothes Muscles and Joints. The hot water and surging jets improve blood flow and relieves the knots and cramps of over-exerted muscles and joints.
- Blood Pressure. A whirl tub can lower blood pressure on two fronts. First, by making the person take time to relax, and thus reduce their stress and blood pressure. Secondly, the hot water increases blood flow.

A soak in a whirl bath tub can leave you feeling invigorated and improve your health.

*Les bains à bulles exercent des effets très positifs sur la circulation sanguine. La pression active la circulation sanguine et aide l'activité cardiaque. Cela permet aussi de relaxer les muscles et d'éliminer les toxines en ouvrant les pores. Ce type de bains permet de soulager les ulcères d'estomac et de récupérer de fractures et lésions musculaires.*

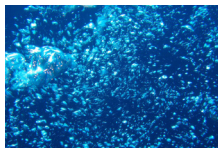

## RECOMMENDATIONS FOR BATHING - RECOMMANDATIONS DE COMMENT UTILISER LE BAIN

1

Enjoy the pleasant sensations of air jets with the massaging power of whirl jets

*Submergez votre corps autant que vous pouvez et relaxez vous.*

2

Select carefully the intensity and position of the jets to your personal preferences.

*Sélectionner l'intensité de pression et la position des buses.*

3

Relax for soaking and unwind your mind.

*Une musique relaxante dans votre bain vous permettra de rêver et de vous évader totalement.*

4

Do not use the whirl tub while under the influence of drugs or alcohol.

*Si vous êtes très fatigué ou sous l'effet de l'alcool ou de médicaments, ne prenez pas votre bain afin d'éviter de vous évanouir.*

5

Do not use the whirl tub when you feel sleepy.

*Si vous avez une sensation de sommeil, sortez rapidement de votre bain.*

6

Do not use massaging jets during pregnancy.

*Si vous êtes enceinte, ne pas activer les buses d'hydro massage non recommandées.*

7

The product is designed to be used only by adults. Children, elderly or infirm individuals should only use the whirl tub under supervision.

*Attention aux enfants ; toujours les contrôler s'ils sont proche ou dans la baignoire.*

8

Make sure you do not activate the hydro system until the tub is filled with sufficient water.

*Ne pas activer le système d'hydro massage avant d'avoir un niveau minimum d'eau.*

9

The recommended bathing time is 15 to 20 minutes.

*Ne pas rester des heures dans le bain. Vous pouvez avoir une baisse de tension. La durée recommandée est de 15-20 minutes. Faites attention au fait que, plus l'eau est froide, plus le bain doit être de courte durée.*

# BATHS - BAIGNOIRES

introduction - introduction

## S0 EQUIPMENT • EQUIPEMENT S0

The S0 version contains a powerful pump for a correct distribution of water into the massage jets of the whirl tub. It is also equipped with a safety system that prevents the pump to work when the aspiration window is blocked. If no water is detected the pump interrupts, to prevent it from working without water and get damaged. Moreover an internal water distribution system avoids water retention in the pipes. Additionally, the pump includes an anti-vibration system to make it more silent and improve your bathing experience. A stainless steel backlit keypad control for operating is positioned on the tub ledge.

Les baignoires avec système S0 sont équipées d'une pompe appropriée pour la distribution de l'eau dans les jets d'hydro massage que ces baignoires possèdent.

Le système de distribution interne d'eau évite la rétention d'eau dans la tuyauterie.

Tous les jets sont orientables, chromés et ont un système manuel d'ouverture et de fermeture. Si le flux d'eau n'est pas détecté, la pompe arrête de fonctionner, évitant ainsi de travailler sans eau.

Un système de sécurité permet d'éviter que la pompe ne fonctionne lorsque la crépine d'aspiration est bloquée afin d'éviter d'aspirer d'autres éléments dans celle-ci.

La pompe est silencieuse et possède des supports anti vibration, permettant ainsi un massage encore plus confortable.

Contrôle par clavier électronique rétro éclairé.

## SX EQUIPMENT • EQUIPEMENT SX

The SX systems, depending on the version, include a powerful pump for water massage jets and a blower for the ultra-slim air blowers that are located at the bottom part of the tub. An air tub system works on the introduction of air into the water to create bubbles and the sensation of an effervescent light massage. The water massage jets also present an ultra-slim format for an approved appearance, with an elegant chrome-white finish, and more comfortable bathing experience.

An incorporated electronic device will detect the water level and will block the system if the minimum level is not reached, even when you activate the start button. The pump is extra silent and includes an anti-vibration system. A stainless steel backlit keypad control for operating is positioned on the tub ledge. Depending on your SX version it will activate hydro massage jets, air jets, chromo therapy and/or automatic disinfection.

Les baignoires avec système SX sont équipées d'une forte pompe appropriée pour chacune des dimensions, garantissant un hydro massage correct.

Les nouveaux jets latéraux ultra plats sont parfaitement intégrés dans les parois des baignoires sans aucune protubérance. Cela permet un confort supplémentaire mais également une élégance avec ses finitions chromées et blanches.

Les buses d'air au sol de la baignoire sont également extra plats permettant ainsi un meilleur confort. La pompe ainsi que les jets incluent un système anti vibration qui permet de réduire le niveau sonore.

Une cellule électronique permet de détecter le niveau d'eau ; ainsi, si le bouton de mise en marche est actionné sans que le niveau minimum d'eau soit atteint, l'hydro massage ne fonctionnera pas.

Les claviers en acier inoxydable ultra brillant et rétro éclairés vous permettent de choisir entre les différentes fonctions d'hydro massage, la chromothérapie et le système de désinfection automatique.

NOKEN DESIGN, S.A.

The contents of this catalogue are protected by virtue of the Spanish Intellectual Property Act, Royal Legislative Decree 1/1996. The partial or total reproduction of this catalogue, without the express authorisation of NOKEN DESIGN is punishable under the Spanish Criminal Code.

Le contenu de ce catalogue est protégé par la Loi des Propriétés intellectuelles. Toute reproduction, même partielle, sans autorisation de Noken Design, S.A. sera sanctionnée par le Code Pénal.

NOKEN DESIGN, S.A.

Reserves the right to cancel and/or change models or accessories without prior notice or replacement. The settings shown in this catalogue are design proposals for advertising purposes. In real situations in which the tiles are laid, we recommend to use as a guide for the installation, the technical specifications available on the Noken Price List.

Se réserve le droit d'annuler, de modifier ou supprimer les produits et accessoires présentés sans préavis ni obligation de les remplacer. Les ambiances présentées dans ce catalogue sont des suggestions de décoration à titre publicitaire. Pour toute installation, il faudra consulter les fiches techniques qui se trouvent dans le Tarif Général édité par Noken.
